Decking**

## composite deck news

**Fact:** Composite decks get dirt, mildew and "slippery slime" algae, AND they stain!

**Solution:** To keep them looking their best and protected from stains, they need:

**FIRST  
USE:**

**Composite Deck Cleaner  
and Spot Remover  
Concentrate**

A strong liquid detergent concentrate, quickly usable to clean spills BEFORE THEY STAIN. Keep it next to your barbeque so you're ready! Plus, dilutable with water for periodic large area cleaning of entire deck. Simple, strong and HANDY!

**AFTER  
CLEANING,  
THEN  
USE:**

**Composite Deck  
Stain Guard  
Finish**

A clear, U.V. fortified, tough polymer coating to protect decking material from most penetrating, otherwise non-removable stains.

Penetrates surface wood fiber content and fills in the "micro-canyons" of the decking material to keep dirt and stains on top of Stain Guard Finish, where they are easily cleanable and separated from the wood fiber content that otherwise soaks up stains. IMPROVES BEAUTY, TOO!

Includes a broad spectrum biocide bound to the coating to protect it from unsightly mildew and unsafe "slippery slime" algae (Polyphase 662 EPA Reg. #5383-108).

## Real Life On A Composite Deck

BEFORE: Untreated soiled composite surface

## Cleaning

Spot removing and cleaning with Sun Frog Composite Deck Cleaner

## Applying Stain Guard

Easy to apply - mop or spray

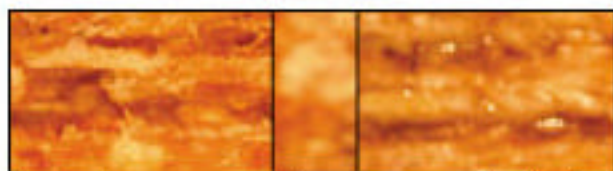

**Done!**  
It's Beautiful!

**Testimonial:** "We recently had a composite deck installed. With eight kids and an active life, it was soon stained and dirty. Nothing removed the stains until we discovered Sun Frog Stain Guard. We applied Sun Frog Stain Guard and Sealer, and in one afternoon my deck was like new. Quick, easy and the tricycles are back on the deck again. Thanks Sun Frog for making my life a little easier!" Yacolt, WA homeowner

## Why Use Stain Guard Finish? Note The Difference!

Magnification: 30X

Unprotected

Stain Guard Finish

• **UnStain Guarded**  
Composite Deck
